

Since 1985, we've grown our business by forming long term partnerships with large global mining companies for the total life of both our equipment and equipment manufactured by others.

SERVICE

Refurbishment & Overhaul

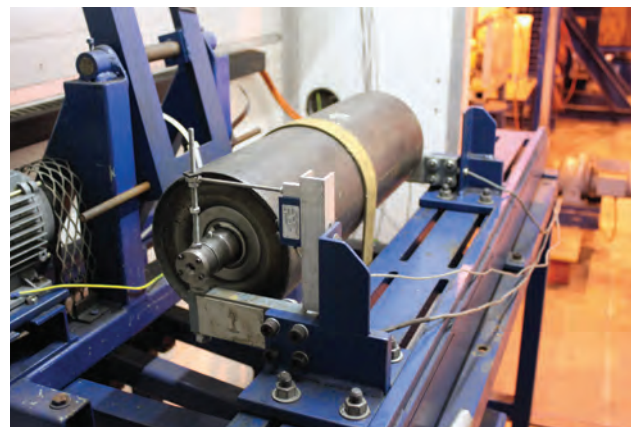

Regular refurbishment and overhaul of system components such as pulleys, idlers, gearboxes, conveyor drives and hydraulic systems is a sustainable measure to ensure conveyors have maximum availability and prolonged life. Our service is not limited to refurbishment of NEPEAN products, we regularly overhaul equipment manufactured by others at a fraction of the replacement cost.

Life-Cycle Management

Since 1985 NEPEAN Conveyors has built understanding and experience with regard to the lifecycle requirements of a conveyor system. Now with proven industry experience, NEPEAN Conveyors works closely with clients to achieve customised solutions.

Asset Optimisation

NEPEAN understands the importance of plant efficiency, especially in a mining environment. With facilities conveniently located in close proximity to Australia's premier mining regions, our teams of

experienced professionals are available to deliver prompt, efficient and reliable service to the world's largest mining companies.

Conveyor Construction, Installation & Commissioning

NEPEAN offer full turnkey system packages complete with project management and site installation along with supervision services for installation and commissioning.

Service & Support

SUPPORT

Conveyor Replacement Parts

NEPEAN Conveyors maintains an efficient inventory program for replacement parts. We also design and manufacture special 'fit for purpose' replacement components.

Technical Support

Locally based technical support, well equipped to provide flexible and complete solutions with an understanding of your equipment and the situation in which it operates.

COMMITMENT TO SAFETY

NEPEAN has a 'zero harm' policy. Whether working at our company facilities or on a client's site, there is no compromise with regard to safety. At all times, NEPEAN employees observe and comply with safety requirements to a high standard.

LARGEST IN AUSTRALIA

NEPEAN Conveyors is the large scale mining conveyors projects arm of NEPEAN Mining, NEPEAN Mining is a division of NEPEAN™, Australia's largest privately owned engineering, mining services and industrial manufacturing organisation. NEPEAN Mining provides an extensive portfolio of Conveyors, Power and Longwall products and services to Australia's mining industry. Each can independently deliver unique, high quality results, or as one company, we offer a one stop mining solution.

WITH MORE LOCATIONS, WE'RE NEVER FAR AWAY

We design and manufacture in multiple locations around the world.
