

Turnkey Conveyor Packages

Boggabri Train Load-out Facility, NSW Coal Fields.

NEPEAN Conveyors supply turnkey conveyor projects from concept to commissioning. Our experienced design team can provide innovative conveying solutions for surface mining, underground coal, hard rock mining, port facilities and process plants.

BUILDING EXPERIENCE AND TRUST SINCE 1985

NEPEAN Conveyors was established in 1985 to provide specialised materials handling equipment for the mining sector. From humble beginnings at our Picton facility, we now supply conveyors to underground and above ground coal, iron ore and hard rock mines, port facilities and process plants throughout Australia, South Africa, China, Indonesia, Japan and the USA.

FROM CONCEPT TO COMMISSIONING – NEPEAN OFFERS COMPLETE CONVEYOR SYSTEMS

In addition to mechanical design and supply of conveyor components, NEPEAN Conveyors is experienced in delivering complete bulk materials handling solutions including:

- Overland conveyors
- Underground coal clearance systems including development, trunk and main gate conveyors
- Drift conveyor systems
- Underground hard rock conveyor systems
- Surface stockpile and reclaim systems
- Process plant conveyor systems
- Export terminal conveyor systems
- Decline development conveyors in hard-rock

NEPEAN Conveyors has the capacity to deliver:

- Functional specification and conveyor design
- Comprehensive range of conveyor equipment
- Site services including installation, supervision, equipment commissioning and routine maintenance
- Operator training and assessment
- Engineering and technical services support

In conjunction with NEPEAN Power, a wide range of electrical substation/starter designs are available, including VVVF and flameproof starters. Development of conveyor control software is integral to our design.

Turnkey Conveyor Packages

Benefits of NEPEAN Designs

Technical Expertise

Experience designing and manufacturing large scale conveyor projects since 1985. Specialising in Overland Conveyor Systems, in underground coal and hard-rock, ports, surface mining systems and industrial sites.

More Locations

Five facilities in Australia including some of the worlds most advanced, hi-tech idler and pulley manufacturing facilities.

Unmatched Support

NEPEAN has established business hubs strategically located near by the largest mining areas so we are able to best service our equipment and support our customers.

Airly CV04 Conveyor, Western Coal Fields, NSW.

Narrabri ROM stockpiling Skyline Conveyor, Gunnedah Coal Fields, NSW

LARGEST IN AUSTRALIA

NEPEAN Conveyors is the large scale mining conveyors projects arm of NEPEAN Mining, NEPEAN Mining is a division of NEPEAN™, Australia's largest privately owned engineering, mining services and industrial manufacturing organisation. NEPEAN Conveyors, NEPEAN Power and NEPEAN Longwall provide an extensive portfolio of products and services. Each can independently deliver unique, high quality results, or as one company, we offer a one stop mining solution.

WITH MORE LOCATIONS, WE'RE NEVER FAR AWAY

We design and manufacture in multiple locations around Australia and South Africa. We are strategically located close by to major mining areas so we can service our coal, hard-rock and port customers.
