22 September 2017

For immediate release

At 9.30pm on Thursday 21 September 2017, plant operators at Nepean Building and Infrastructure's Yagoona galvanising business reported a small leak from the galvanising kettle. The area was isolated immediately and importantly no one was injured.

As a precaution, the NSW Fire Brigade was called, as reported by the media, and fire trucks attended the site at approximately 10.00pm. The cause has been identified and we will have the plant operational again in the shortest possible time. Customers can expect us to arrange for their work to be galvanised by our industry partners in Sydney with only minor delays.

Further information will be provided as this comes to hand.

In any event, please call Anthony Sive, the Managing Director of Nepean Building & Infrastructure on 0439 328 329 or Anthony.Sive@nepean.com or Daniel Davis, Nepean Commercial Manager on 0417 689 072 or Daniel.Davis@nepean.com for further information.

A handwritten signature in black ink, appearing to read 'ASive'.

Anthony Sive
